FULL STACK WEB DEVELOPER

- Full Stack web developer able to build a Web presence from the ground up - from Front End concept, navigation, layout and programming to Back End.

- Skilled at writing well-designed, testable and efficient code using current best practices in Web development.

- Fast learner, hard worker and team player who is proficient in an array of scripting languages and multimedia web tools.

TECHNICAL SKILLS

- Languages: JavaScript, jQuery, JSON, NODE, SQL, CSS, CSS3, HTML5, HTML/CSS.

- Database: MySQL 8.0, MongoDB, Firebase, Docker.

PROJECTS

Oct 2019

Music App? GitHub Repo: https://nicoloparco.github.io/Bootcamp-Project-1/

- Full Stack Web App that sources for music videos and artist information.

1. I worked with a team of four in building a Full Stack Web App that pulls searched musical videos through Youtube API and also the artist information like events through Bandsintown API.

2. We also used Firebase to create an authentication so that users gets to create an account, that helps them login to view their profile and make comments.

3. Technologies used: HTML5, CSS3, HTML/CSS, JavaScript, jQuery, ES6, Firebase App, Firebase Auth, Firebase Database.

4. Responsibilities: Task was divided among all four of us and i was involved in both front and most especially the back end of this Music App.
